ASSIGNMENT 07

Colour Blind Mode for the Bharat Matrimony Website

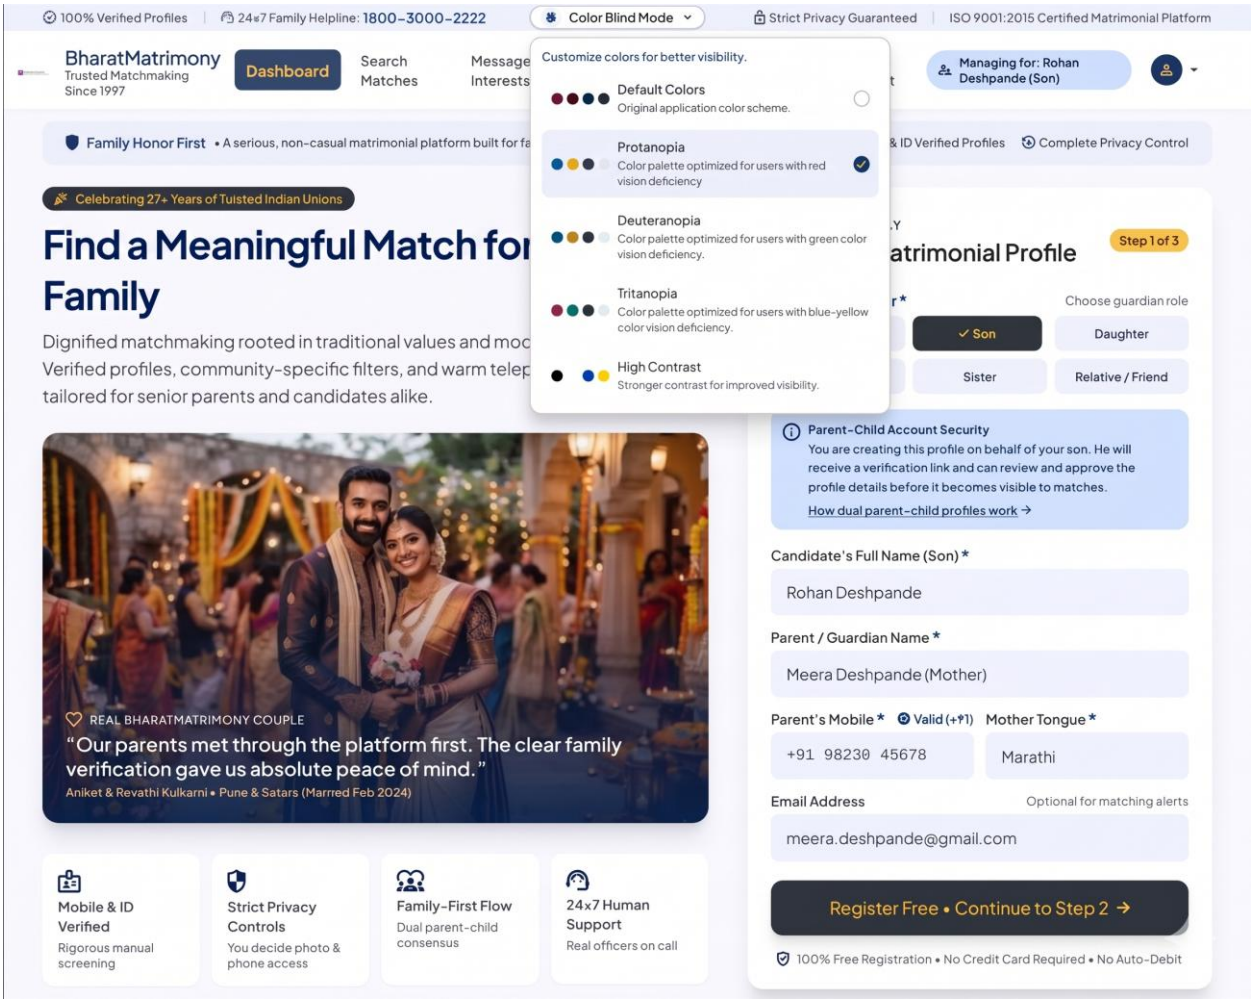

Assignment No.	07
Name	Nikhil Sainath Karmare
PRN	1262243774
Group	11
Assignment Title	Added Colorblind option to optimize website for colorblind people

Objective

To optimize the Bharat Matrimony website for colour-blind users by adding a Colour Blind Mode option in the header and ensuring that important information (Profile, ratings, verification, actions) is conveyed through text, icons and contrast rather than colour alone.

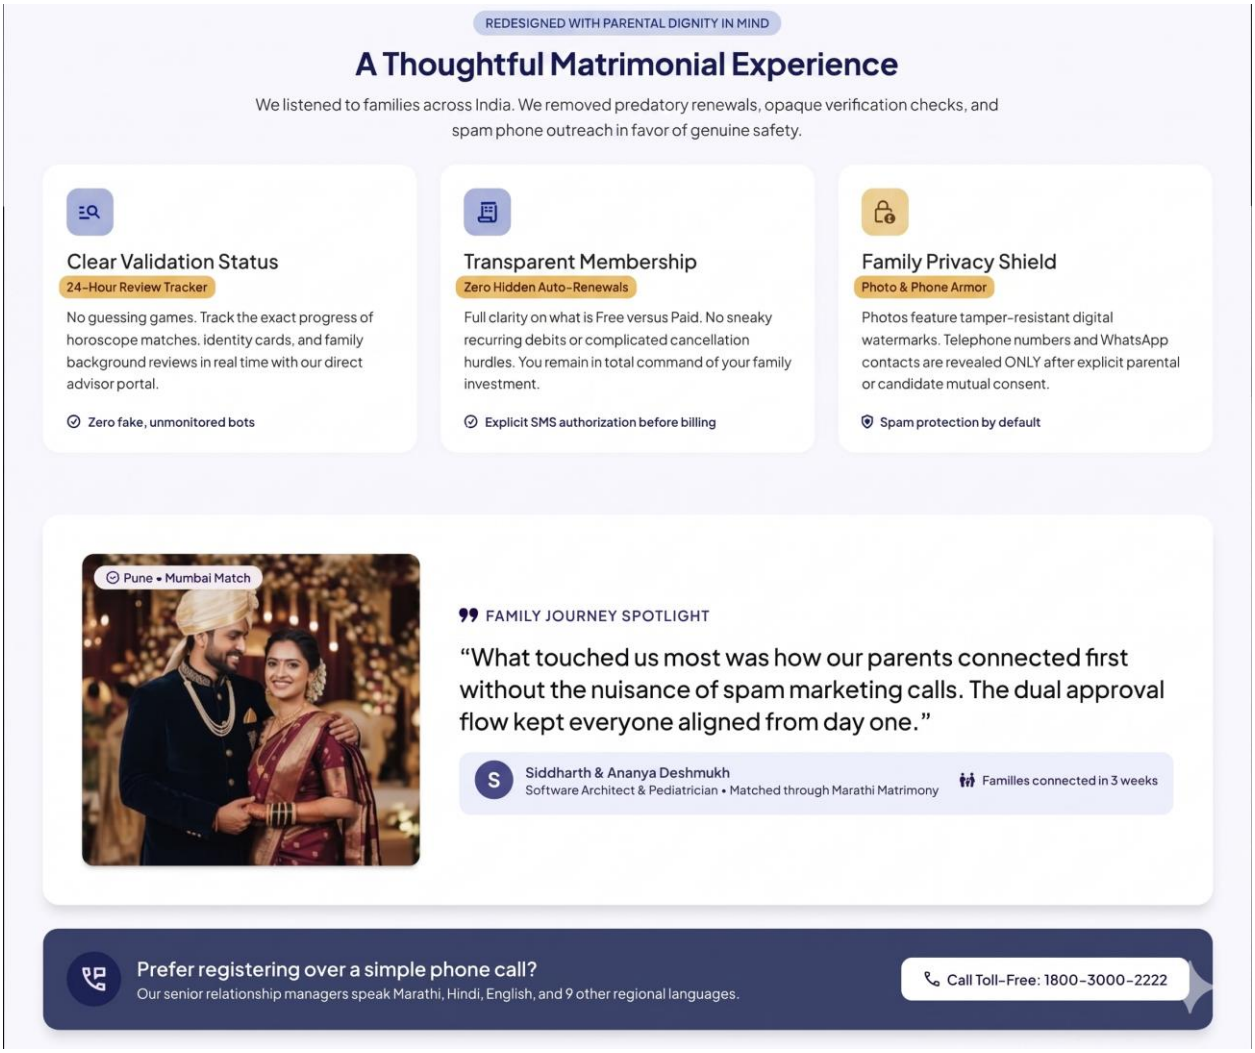

Website Screenshots

Figure 1: Home page – Colour Blind Mode selector in the header

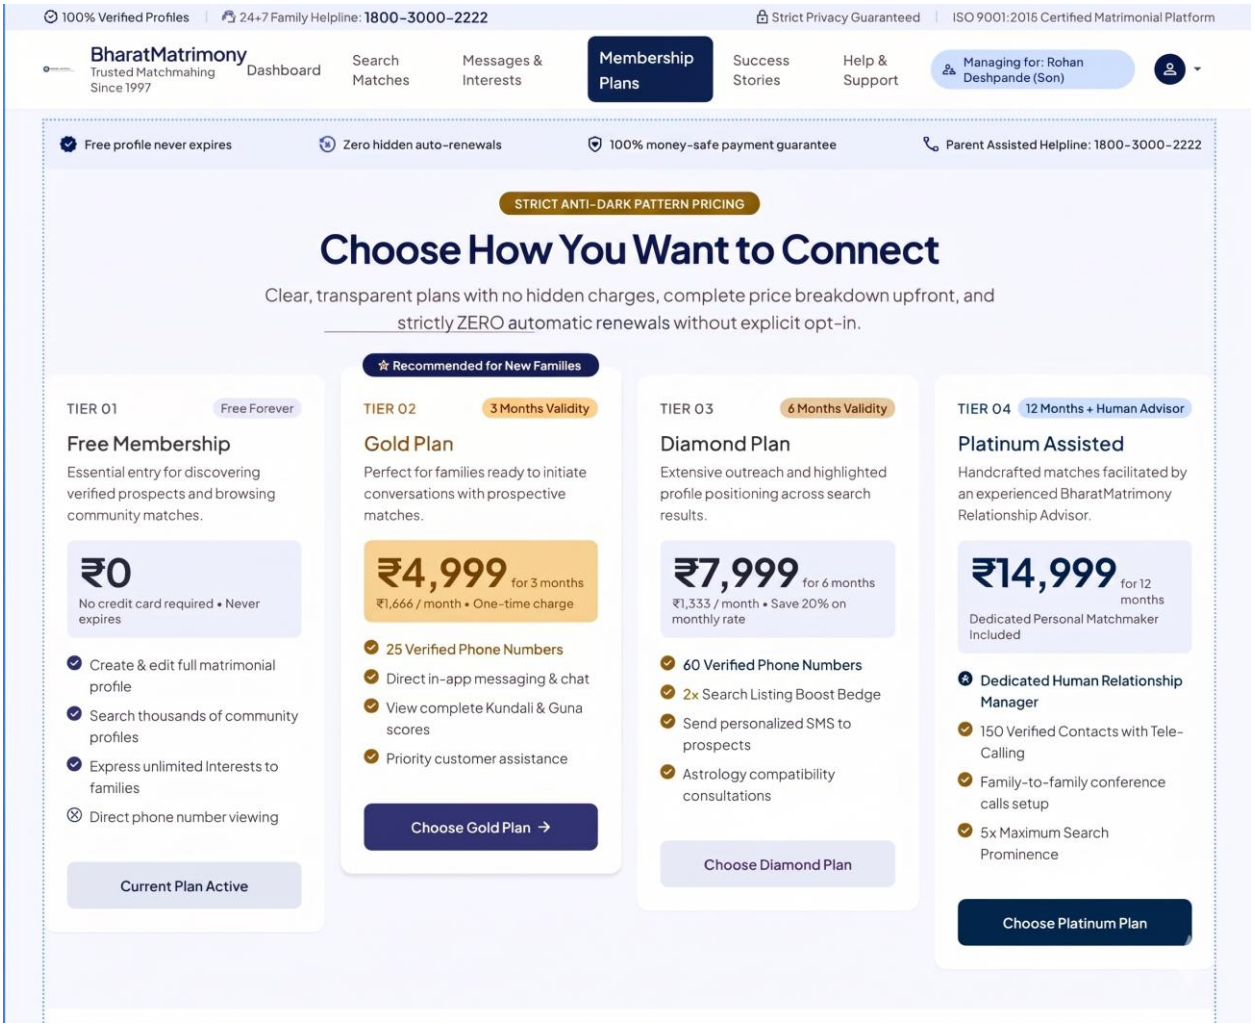

The “Color Blind Mode” control sits in the top navigation bar, always visible and keyboard-focusable, with a clear teal outline.

Figure 2: Key Features and Trust-Building Elements of the Matrimonial Website

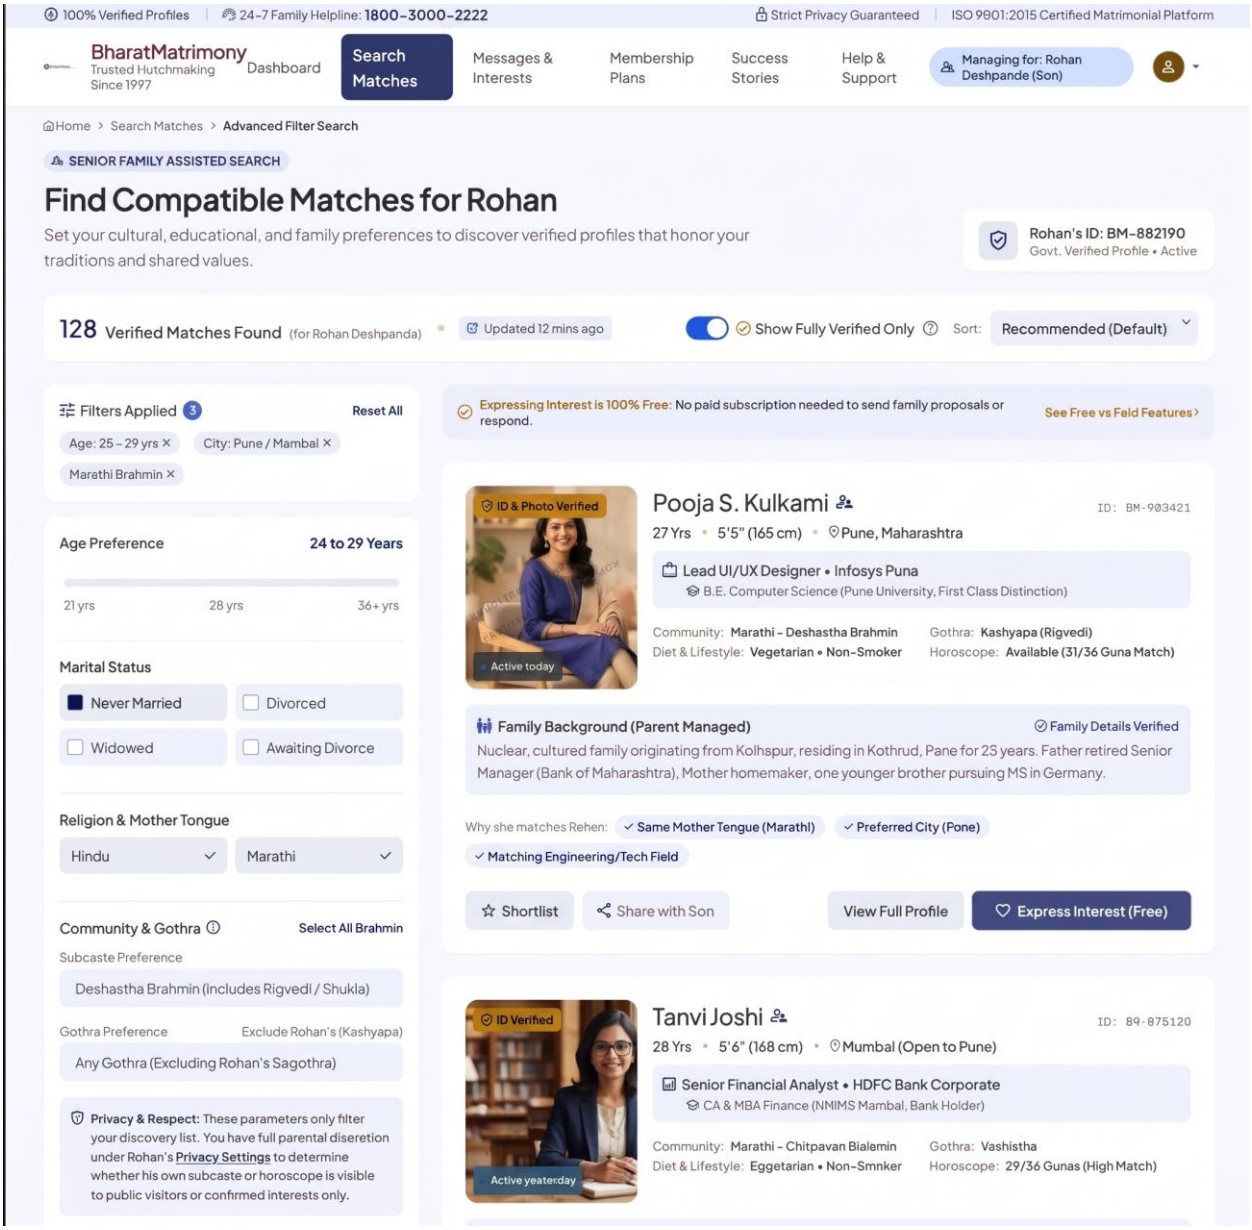

The website highlights user safety and transparency through clear validation status, transparent membership terms, and family privacy protection. It also showcases a family success story and provides a direct call-to-call support option to improve user trust and confidence.

Figure 3: Membership Plans and Transparent Pricing for the Matrimonial Website

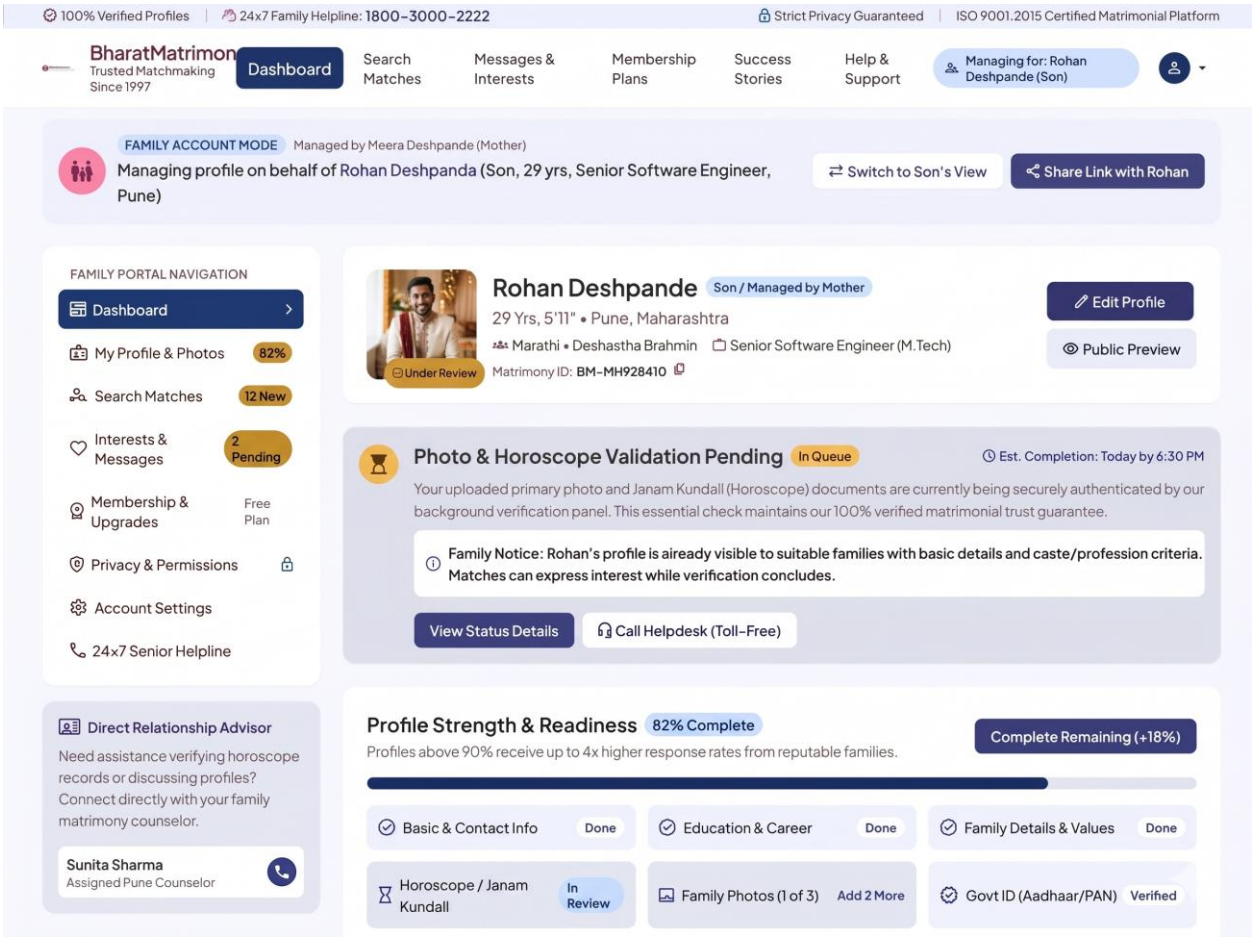

Navy blue buttons, dark text, and light backgrounds improve readability, while labels such as "Gold Plan" and "Free Membership" ensure users can identify plans without relying on colour alone.

Figure 4: Accessible Colour Contrast and Visual Indicators in Match Search Results

High-contrast text, clearly labelled filters, and distinct buttons improve readability for users with colour blindness. Icons and text labels provide additional visual cues, ensuring important information is not communicated through colour alone.

Figure 5: Colour Contrast and Status Indicators for Accessible Profile Management

Distinct colours, icons, and text labels such as "Under Review," "In Queue," and "Verified" help users with colour blindness identify profile statuses and pending tasks without relying on colour alone.
